

Swimming Assessment

Parents,

Camp Nehemiah's activities include weekly swimming. To ensure your child's safety, we need information on your child's swimming ability. Please place your initials next to the level of swimming listed below that coincides with your child's **current** ability to swim.

Please check the line below corresponding to your child's swimming level:

_____ **Beginner** (no previous swimming lessons - **NEEDS FLOATATION DEVICE**)

_____ **Intermediate** (some lessons, no floatation device needed – can stand with head above water)

_____ ***Advanced** (swims comfortably underwater in the deep end of the pool)

Swimmers will be given wristbands based on the selected level of swimming. This wristband will ensure the safety of your child by only allowing them to swim in areas deemed safe for their swimming ability. Campers at the beginner swimming level will be required to wear a floatation device.

I hereby affirm that my child, _____ is at the level of swimming selected above. If Camp Nehemiah counselors deem that my child is at a lower level of swimming, I give them permission to move my child to a lower level to ensure their safety while swimming.

Date

******* Swim assessments are required for all advanced swimmers and will be completed by a camp counselor. If counselor feels camper is not ready for advanced swim level, they will be placed in the intermediate level until further testing is allowed.**
